Alex, Chris, and Jeremy – Please let me know when you each plan to arrive in Denver. I'd like to schedule some time late in the day on Wednesday or early on Thursday morning to finalize our prep for the PFAS panel.

Also, below are some sample proposed questions for possible live polling. I'm working with ABA staff to learn more about how we could effectively integrate the polling into our presentation. Please provide suggested edits to the draft questions and let me know if you want to cut any or add new ones.

1. When did you first learn that PFASs are an environmental law issue?
 - More than three years ago
 - Last year
 - This year
 - When I saw this topic on the ABA SEER Spring Conference agenda
2. The PFAS family includes how many chemicals?
 - Two, PFOA and PFOS
 - Less than 100
 - More than 100
 - Unknown, but at least 2000
3. Have Maximum Contaminant Levels (MCLs) been set for chemicals in the PFAS family?
 - Yes
 - No
 - It depends on whether you live in New Jersey
4. What is the best regulatory limit to set for PFOS (a PFAS chemical) in drinking water?
 - No limit
 - 400 parts per trillion
 - 70 parts per trillion

- 13 parts per trillion
5. Who should determine appropriate regulatory limits PFAS chemicals?
- US EPA
 - Individual states
 - Industry
 - The courts

Thanks!

JBK

Sonia - Thank you to you, Mary, and Derrick for joining the call today. Attached are the following:

- "A PFAS Primer" – the paper that Sarah and I wrote for the panel;
- ABA brochure for the SEER Spring Conference; and
- Chris Higgins' presentation slides as of earlier this week.

Please let me know if you or Alex have any additional questions.
